

3 Positions Available:

- Commissioning & LEED Department Manager / Energy Star Assessor
- LEED Project Manager
- Energy Modeler / LEED Engineer

The Epsten Group is an architectural and engineering firm with a specialty in LEED, commissioning of mechanical systems and building envelopes, and energy modeling. Additionally, we are a national LEED certification consultant to the USGBC.

We are experiencing growth with our client's increased interest in sustainability for national and international projects. We are looking for individuals with mechanical engineering or related degrees and accreditations/experience in:

- Commissioning and Management of a department with several staff members & multiple projects (Accredited Commissioning Process Authority Professional, P.E., LEED AP, Microsoft Project proficiency and Energy Star experience desirable); or,
- LEED Project Management (LEED AP desirable); or,
- Energy Modeling / LEED Engineering (experience with eQuest or similar software and with LEED desirable).

Occasional travel, mostly in the Eastern United States, may be required for commissioning and LEED project positions. Our new office location is near downtown, 429 Edgewood Ave, Atlanta GA 30312, in a LEED-NC Platinum certified building.

Compensation commensurate with experience. Benefits package include Blue Cross Blue Shield group health insurance, three weeks personal time off, and after 2 years, a SIMPLE retirement plan.
